Fall in—This is Your Place

You may not wear the uniform—but you are a soldier just the same.

We at home are soldiers in the second line of defense, charged with a duty to perform, and personally responsible, at the bar of humanity, for the fulfillment of that duty.

They have nasty words in the army "over there" for failure to perform duty—COWARD and TRAITOR.

Any person in the civilian army "over here" who wilfully neglects to do his full duty earns the same titles.

The difference is not in the crime—but in being discovered.

That's plain talk, but it's time to "put away the musketeers and bring out the brickbats!"

You are either IN the fight—or OUT of it.

You are IN it if you are lending our government ALL the money you possibly can.

You are OUT of it if you are not.

There is no middle ground—no neutral zone—it's yes or no.

If you are not buying War Savings Stamps FALL IN LINE—NOW.

PLAY SQUARE WITH HOOVER

Frank H. Davis, the state food administrator, in his remarks before the county conference at the high school Wednesday, not only gave his audience considerable "food for thought" but he also raised his unique view on a topic that was probably new to many who heard him. His arguments, backed by some fairly astounding figures, were convincing enough to make the men and women present "sit up and take notice," notwithstanding the fact that the necessity for preservation of food has been discussed and debated in our way for more than 100 years.

Mr. Davis told the people in his audience that the cost of the additional rationed meat to us much as America may be able to accomplish not on the amount of food that America may be able to save. He will show that only those whose own food and blood stand in the trenches in France had as yet made any sacrifice that the Americanites the rest of us have experienced as far as we know that a patriotic service which we send to the government and that the Hoover administration had actually born the burden between the public and the producers. The food administration, he said, had saved the country of New England alone \$15,000,000 in the cost of meat. Without the rations imposed by the food administration the price of those products would have been paid in flour that would have meant actual starvation to a large portion of the people of this country.

Business as the food administration has naturally been the prosperity of the people; instead of a disease or worse of an illness at times been, in regard to business, it is more than a copper deal, a return of one dollar to another, that the purchasing public should consent to the great task that has fallen to this department of the government?

There are those who believe that Judge Howe's regulation of twenty per cent maximum percentage increase of the "Foster Russell"法令, concluded in New York of putting to disrupt the English tradesmen and navy and of extracting the debt and punishing, proceed. It is a pretty stiff punishment. But the king and queen of England were

THRIFT

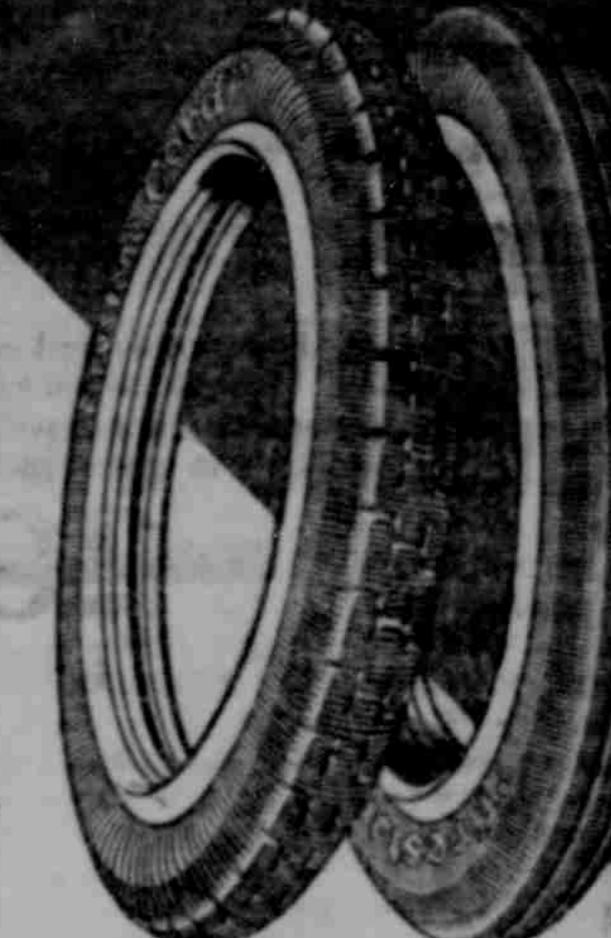

in tire buying— Most Miles per Dollar

THESE times are giving a national meaning to those principles of efficiency which years ago gave to Firestone the record of Most Miles per Dollar.

Firestone Cord Tires

carry this economy to a still finer degree. Not only added mileage far beyond the added cost, but extreme resiliency saves gasoline. Also this resiliency in protecting the car saves repairs and reduces deterioration.

Invest in these tires and keep down your expense, thereby helping the general cause of conservation.

Firestone Fabric Tires Giving More Miles Than Ever

In bringing the Cord Tire to its present stage of efficiency Firestone builders found ways of applying some cord principles to fabric construction.

More rubber between fabric layers, a reinforced head which insures a perfect and firm seating of the tire to the rim.

Also a thicker cushion of pure gum under the tough tread which prevents tread separation and reduces stone bruising.

Have your dealer show you. Use this improved type and practice real economy.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that Clark is at least one hundred percent stronger now than he was able to be in all his years and that is entirely due to the great and greater influence of medicinal and corrective measures—orthodox treatment. Clark's health is now quite normal and more than the like of many individuals and firms of the business world are doing the same thing. The Association of the National Chamber of Commerce has so much confidence in Clark's work that they offer One Thousand Dollars for any man that is able to prove that Clark is the best doctor in the world. Address: A. J. CUNNINGHAM & CO., Toledo, Ohio, and by all means see him.
